

Building STRONG Information Security Programs

Secure Banking Solutions (SBS) is a premier cyber security consulting company that aims to make a positive impact on financial institutions and help them achieve successful IT examinations. SBS focuses exclusively on the security of the banking industry and offers a variety of products and services, such as:

Products

- TRAC – An integrated, web-based cyber security risk management software. It simplifies the risk management process and allows the user to make more informed security decisions.
- Verify – An affordable ACH whitelisting software that offers a simple way for banks to compare ACH batch files against an approved list of payment recipients. This process provides an added layer of security in protecting bank customers from CATO.

Audit Services

SBS' risk-based audits are tailored to the size and complexity of each financial institution. We offer a variety of audit services that examines the three key areas of cyber security: people, process, and technology.

Consulting Services

SBS' educated and experienced consultants assist our partners in the building and maintenance of a valuable, comprehensive, and repeatable information security program. Consulting services include digital forensics, security awareness training, incident response planning, information security program design, and more.

- Cyber Security Partnership - Provides a dedicated and experienced consultant to assist in designing and strong information security program. The consultant will work on a weekly basis with the institution to implement and test security practices.
- Full Service Vendor Management Program – Security experts will complete vendor risk assessments, conduct annual vendor reviews, collect and manage due diligence documents and contracts and provide alerts on problem vendors to the institution.

Education

The SBS Institute offers certifications to create confidence with examiners and auditors on bank preparedness. These role-based certifications provide students with a platform to increase information security awareness and risk management. Education programs include:

- Certified Community Banking Security Professional
- Certified Community Banking Technology Professional
- Certified Community Banking Vendor Manager
- Certified Community Banking Board of Directors
- Certified Community Banking Ethical Hacker
- Certified Community Banking Incident Handler
- More to come!
